

# Vaccine Incident Report and Worksheet Instructions

## Refrigerator: 36.0° to 46.0° F/2.0° to 8.0° C - Aim for 40.0° F/5.0° C Freezer: - 58.0° to 5.0° F/-50.0° to -15.0° C - Aim for below 0° F/-20.0°C

If recorded temperatures are not within acceptable ranges and are indicated by "Too Warm" or "Too Cold" on the temperature log, follow the steps below:

- 1. If vaccine temperatures are out of recommended ranges for **less** than 30 minutes during temperature logging, take immediate action to correct the problem.
  - Document corrective action taken on the temperature log and recheck temperatures every 30 minutes to ensure temperatures have returned to acceptable ranges. If there is not enough space on the temperature log to document corrective action taken, write action taken on a separate sheet of paper and attach to the temperature log. Retain this information for three years.
- If vaccine temperatures are out of recommended ranges for more than 30 minutes, immediately call the vaccine manufacturers. Complete the Vaccine Incident Report and Worksheet within five days of the incident. Also, complete any returns or waste in PIERS as needed.
  - List all details on the incident report.
  - Include description of incident.
  - Describe incident resolution.
  - Include corrective action plan.
  - Answer all questions on the report.
  - List all vaccines that were in the affected storage unit at the time of the incident (i.e., name, lot number, expiration date, number of doses).
  - Record manufacturers' recommendations, along with case number if available. List vaccine doses keeping, destroying, and returning.
  - Attach copy of temperature log to completed Vaccine Incident Report and Worksheet and fax to 717-214-7223 or scan/email to <u>RA-pavfc@pa.gov</u>.

Notify the VFC Program at 888-646-6864 or email <u>RA-pavfc@pa.gov</u> in the event of a cold chain failure, if you have any questions, or if you need assistance.

## Vaccine Incident Report and Worksheet Instructions

If temperatures are out of range less than 30 minutes:

Take immediate action to correct the problem.

Document corrective action on Step 3 of the temperature log.

Recheck temperatures every 30 minutes to ensure temperatures have returned to acceptable range.

If temperatures are out of range more than 30 minutes:

Mark vaccine "Do Not Use." Immediately contact manufacturers.
