PennDOT Clinton County Maintenance Work Schedule for the Week of October 21

Clearfield, PA – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Clinton County the week of October 21. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Clinton County for the coming week is as follows:

Crack Seal & Hot Pour Mastic

- Interstate 80 between mile markers 170 and 185. Monday, October 21, through Friday, October 25. PennDOT will implement short-term lane closures while completing this work.

Crack sealing and hot pour mastic operations prevent water intrusion from seeping through cracks or joints in an asphalt road, which can lead to potholes and pavement breakup. They are proactive preventive maintenance strategies to prevent water from entering the roadways and accelerating the formation of potholes and other failures.

Pipe Replacing & Cleaning

- Route 477 between the intersections of Rossmans Lane in Lamar Township and Pepper Run Road in Greene Township. Monday, October 21, through Friday, October 25. Flaggers in the roadway will provide traffic control during daylight hours.

Pipe replacement and cleaning are essential in maintaining water flow around state roadways. Controlling water flow is one of the most important aspects of maintaining pavements. Uncontrolled water flow will damage both the pavement surface and the area under the pavement, which causes deterioration across the length of the pipe.

Side Dozing

- Route 220 between the Interstate 80 interchange at Lamar and the intersection of Route 477 in Lamar Township. Monday, October 21, through Friday, October 25. Flaggers in the roadway will provide traffic control during daylight hours.

Side dozing removes excess material from beneath guide rail areas, which improves drainage and allows water to sheet flow off the roadway. Side dozing is a crucial highway maintenance operation because when drainage systems do not function properly, water collects on the road, weakens pavement, accelerates the formation of potholes, and creates the potential for icing conditions in the winter months.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
