PennDOT Juniata County Maintenance Work Schedule for the Week of October 14

Clearfield, PA – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Juniata County the week of October 14. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Juniata County for the coming week is as follows:

Crack Seal & Hot Pour Mastic

- Route 2012 (Leister Valley Road) between the intersections of Route 2015 (Ehrenzeller Road) in Fayette Township and Route 2017 (Evendale Hill Road) in Monroe Township. Tuesday, October 15, and Wednesday, October 16. Flaggers in the roadway will provide traffic control during daylight hours.

Crack sealing and hot pour mastic operations prevent water intrusion from seeping through cracks or joints in an asphalt road, which can lead to potholes and pavement breakup. They are proactive preventive maintenance strategies to prevent water from entering the roadways and accelerating the formation of potholes and other failures.

Manual Patching

- Route 3002 (Main Street) approximately half a mile east of the intersection of Pfoutz Valley Road continuing eastbound for half a mile toward Millerstown in Delaware Township. Thursday, October 17. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2002 (Miller Hill Road) between the intersections of Doe Run Road and Center Road in Walker Township. Friday, October 18. Flaggers in the roadway will provide traffic control during daylight hours.

Most permanent pothole patching is completed in the spring/summer when temperatures stay consistently above freezing. If maintenance crews were not repairing potholes, the road surface would break up further and require more expensive corrective measures.

Pipe Replacing & Cleaning

- Route 3005 (Chicken Plant Road/Nelson Road/Cedar Springs Road) between the intersections of Route 75 in Walker Township and Route 2006 (Cross Street) in Fermanagh Township. Tuesday, October 14, through Friday, October 18. Flaggers in the roadway will provide traffic control during daylight hours.

Pipe replacement and cleaning are essential in maintaining water flow around state roadways. Controlling water flow is one of the most important aspects of maintaining pavements. Uncontrolled water flow will damage both the pavement surface and the area under the pavement, which causes deterioration across the length of the pipe.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
